Vision of the Friends of Kloofendal (FroK)

The Friends of Kloofendal envisages the Kloofendal Nature Reserve preserving natural fauna and flora, managed according to sound ecological principles, where many people enjoy the natural environment in safety and peace. The facilities in the amphitheatre area support the nature experience with displays and educational materials, and provide a base for guided nature walks and environmental educational presentations as a service for all. The Confidence Reef, site of the first goldmine on the Witwatersrand and the first stampmill in Kloofendal, are part of the Environmental Education programme in the reserve & amphitheatre area.

I / we support and endorse the vision of FroK
